### **Brief Study Guide**

# Nolan's Recap

In the vast expanse of the world, there are as many realities as there are minds to perceive them. Each moment, each scene, is uniquely filtered through the lens of one's own experiences, emotions, and creativity. **"Nolan's Recap"** is more than a mere capture of moments, it is an invitation to unlock the artistry hidden within your perception of the world. Here, you are not just holding a camera; you are holding the key to a universe of limitless possibilities.

Over two days, you will document not just events, but emotions, perspectives, and the unseen beauty in the mundane. Every fleeting moment is an opportunity, a story waiting to unfold. Your task is simple yet profound: record the highlights of Day 1 and Day 2, but not through an ordinary lens. No. You must see through your vision, your creativity, your sense. What is your world like through your eyes? How do you perceive the dance of light and shadow, the rush of a fleeting thought, or the quiet whispers of nature? Capture it.

But as in every masterpiece, the path to creation is never without its challenges. A series of curveballs will be thrown your way such as unexpected twists, mysterious prompts, and specific moments that must be woven into your narrative. These challenges will test not just your ability to capture images, but your creativity to twist, turn, and adapt your vision into something truly unique.

Will you rise to the challenge? Will your lens find the magic in the mundane, the beauty in the chaos, and the wonder in the fleeting? Your reel is not just a collection of moments; it is an exploration of your artistic soul, an extension of how you see the world. Your mission: *To record the art of life, with your own personal touch.*

Teams that are successful in “Nolan’s Recap” will activate the “**Multiplier**” perk, a powerful advantage that allows them to amplify their final score by a set percentage in any one module round of their choice.

This strategic boost can turn the tide of competition, rewarding both careful planning and daring moves. The increased score will give them a significant advantage on the leaderboard, helping them climb to the top with a commanding lead. To redeem it, teams must present the perk token to the secretariat for approval. Once activated, the perk cannot be applied again, so teams must plan its use astutely.
